Pittsburgh, PA | +1-716-400-6921 | ankita.vinculum@gmail.com | www.linkedin.com/in/ankita-agrawal-66141159

SENIOR SDET | QA STRATEGY & AUTOMATION FRAMEWORK DESIGN | GENAI & AGENTIC AI WORKFLOWS

PROFESSIONAL SUMMARY

- Senior SDET and Quality Engineering professional with **11+ years of experience** across test automation, API and integration testing, mobile/native applications, web platforms, database validation, and end-to-end product quality.
- Designed and optimized **BDD, data-driven, and hybrid automation frameworks** with reusable utilities and parallel execution, supporting **20+ business workflows** with positive, negative, integration, and end-to-end scenarios.
- Strong coding and automation foundation across **Java, JavaScript, and TypeScript**, with experience building maintainable web, mobile, and API automation integrated into CI/CD pipelines.
- Applied AI and Agentic AI to Quality Engineering, including an **AWS Kiro-powered Jira defect workflow**, along with AI-generated test-design using Amazon Bedrock and AWS services.
- Cross-industry Quality Engineering experience - **Agriculture and Financial Capabilities, E-commerce, Banking, Healthcare, Marketing Analytics, and Logistics**

TECHNICAL SKILLS

- **Test Automation and Frameworks:** WebdriverIO, Selenium WebDriver, Cucumber, TestNG, JUnit, Maven, Playwright; BDD, data-driven and hybrid frameworks, parallel execution.
- **API and Data Testing:** REST Assured, Karate, Postman, GraphQL, contract and integration testing, service mocking, data seeding, SQL Server, MongoDB.
- **Mobile and Cross-Platform Testing:** Appium, BrowserStack, iOS, Android, responsive web and cross-browser testing
- **CI/CD and Source Control:** Jenkins Core, GitHub Actions, Git, GitHub, Bitbucket, pull requests and code reviews
- **Performance, Observability and Accessibility:** JMeter, LoadRunner, Google Lighthouse, Splunk, Datadog.
- **AI-Assisted Quality Engineering:** AWS Kiro Agent/Kiro IDE, Amazon Bedrock, GitHub Copilot, Antigravity, Agentic AI workflows, prompt engineering, human-in-the-loop design, structured outputs, guardrails and RAG.
- **Programming and Scripting:** Java, JavaScript, TypeScript, Node.js, SQL, JSON; Python and Pytest
- **Test Management and Delivery:** Jira, Zephyr, TestRail, Confluence, Agile, Scrum, Kanban, shift-left testing.

PROFESSIONAL EXPERIENCE

NUTRIEN AG | Senior Software Quality Analyst (SDET) | Pittsburgh, PA | September 2022 – July 2026

- Owned test strategy and product quality for grower-facing financial and digital platforms spanning **payments, invoicing, financial, purchase history, campaigns, and prescription capabilities** across web, mobile, API, and backend.
- Designed and optimized reusable **BDD and data-driven automation components** with parallel execution, supporting **20+ business workflows** and end-to-end scenarios while improving regression maintainability and feedback speed.
- Architected and built an AI-driven Jira defect-creation workflow (**AWS Kiro Agent/IDE**) featuring context-aware prompting, guided clarification, structured output, and duplicate-ticket detection, cutting defect creation to **under 1 minute**.
- Scaled adoption org-wide to **50+** Quality Engineers, Product Owners, and developers, enforcing **100%** required-field completion, consistent defect structure, and full story traceability.
- Developed and maintained automated BVT, smoke, regression, API, integration, mobile, and data-validation coverage using **WebdriverIO, Cucumber, JavaScript, Appium, Postman, GraphQL, REST APIs, and SQL**.
- Engineered Jenkins **CI/CD execution** for scheduled, deployment-triggered, and environment-specific regression runs across QA and pre-production, enabling earlier feedback as releases progressed between environments.
- Strengthened data integrity and test repeatability through SQL queries and API-driven test-data strategies, validating REST and GraphQL responses against backend database records.
- Prototyped **AI-generated test scenarios and intelligent testing workflows** during an internal innovation hackathon by integrating Jira and Zephyr data with **Amazon Bedrock and AWS Lambda services**.
- Prevented critical customer-facing regressions by uncovering complex cross-platform defects, including iPad PDF failures and Android crashes, triggered by specific operating-system, orientation, device, and feature-flag conditions.
- Led validation across web, iOS, and Android **using Appium, BrowserStack, simulators, emulators**, and physical devices; incorporated Google Lighthouse performance and WCAG accessibility check into release-readiness testing.
- Drove **shift-left and risk-based testing** during story refinement, uncovering requirement gaps, edge cases, integration risks, and test-data dependencies before development completion.
- Established **cross-team standards** for automation and defect management; reviewed Git pull requests and automation code and partnered with Product and Engineering on test coverage, release readiness, and production-quality risks.

LTK | Senior Software Engineer in Test | Pittsburgh, PA | July 2022 – September 2022

- Led web and native-mobile quality validation for LTK's creator, influencer, and brand platform across iOS, Android.
- Created reusable QE workflows, templates, and operating processes that streamlined daily test planning, execution, defect management, and reporting for other Quality Engineers.
- Earned recognition from Product & Engineering for improving team consistency, collaboration, and testing efficiency.

PLANNED CAREER BREAK International Relocation to the United States and Family Caregiving | August 2018 – June 2022

PUBLICIS SAPIENT | Senior Associate – Quality Analyst | India | June 2014 – July 2018

- Led Quality Engineering delivery across **e-commerce, automotive, retail, and marketing analytics** platforms for global brands including **Carter's, Michael Kors, Renault, Nissan, Ascena Retail, GODIVA, and L'Oréal**.
- Delivered **functional, regression, integration, API, and mobile validation** across customer-facing applications, backend services, and interconnected enterprise systems.
- Strengthened repeatable regression coverage by developing reusable **Selenium WebDriver, Java, and TestNG automation components** across multiple client engagements.
- Protected data integrity and business workflows across **Renault and Nissan automotive platforms** by validating REST APIs, backend services, and connected-system integrations using Postman.
- Assessed **application performance and scalability** using JMeter and LoadRunner, analyzing response times, transaction behavior, throughput, and system bottlenecks.
- Prevented pre-release **compatibility, layout, accessibility, and customer-experience defects** through cross-browser and responsive-web testing across desktop and mobile environments.
- Standardized **QE processes and governance** across multi-client engagements, including defect workflows, requirements traceability, test documentation, quality reporting, and review practices.
- **Mentored junior analysts and offshore QA engineers**, reviewed test deliverables, and strengthened team practices in test design, defect quality, regression coverage, and release readiness.
- Partnered with Business Analysts, Product Managers, Developers, and Architects to translate complex requirements into **risk-based test strategies and comprehensive coverage**.
- Presented **Product Increment demonstrations during Sprint Reviews** and served as a primary QA contact for high-traffic international client platforms.

VINCULUM SOLUTIONS | Quality Analyst | India | March 2011 – June 2014

- Delivered functional, database, integration, regression, compatibility, and end-to-end testing across **Healthcare, Banking, and Logistics** applications.
- Validated clinical-research and pharmaceutical-device systems for **CLARIO Germany**, online account-opening and customer-onboarding workflows for a leading Indian bank, and shipping processes for Jardine Shipping & Services.
- Developed SQL queries, traceability matrices, test documentation, defect reports, and quality-status reporting using **SQL Server, TFS, Bugzilla, and Microsoft Dynamics Axapta**.

ONDEMAND WEB SOLUTIONS | Test Engineer | India | May 2010 – February 2011

- Performed functional testing, test-case execution, and database validation using Bugzilla, Microsoft Excel, and SQL Server while coordinating requirements and defects across clients, developers, and designers.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- **AWS Generative AI and AI Agents with Amazon Bedrock Professional Certificate** AWS/Coursera, 2026
- **Google AI Professional Certificate**, Google/Coursera, 2026
- **Spec-Driven Development with Kiro**, AWS Skill Builder, 2026
- **Playwright with Python and Pytest for Web Automation Testing**, Coursera, 2026
- **Professional Scrum Master I (PSM I)** Scrum.org, 2022
- **ISTQB Certified Tester – (CTFL)** International Software Testing Qualifications Board

EDUCATION

- **Bachelor of Engineering in Information Technology**, Rajiv Gandhi Technical University, Bhopal, India | 2006–2010
